Centiq and Dell Technologies: Best in class, SAP-certified solutions for optimising on-premise infrastructure

Running S/4HANA or enabling your on-premise SAP applications to operate more effectively can generate the need for new IT infrastructure, presenting key challenges:

Heavily customed landscapes and monolithic systems that no longer meet the needs of the business

- No 1 factor for increased IT spend the need to replace aging infrastructure 1
- **64% of CIOs** are currently rolling out next-generation ERP or modernising legacy platforms ²

Lack of skills to modernise SAP landscape or integrate SAP HANA

- 80% of IT leaders have postponed or cancelled their SAP migration due to a SAP skills shortage internally.³
- 35% agree SAP skills will hinder their organisations move from on premise to cloud.4
